Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

This response is to the Office Action mailed April 18, 2003. The Office Action restricted claims 1-28 under 35 U.S.C. § 121 as follows:

- I. Claims 1-4, 10, 11, 20-26 are said to be drawn to a device for boring into bone, classified in class 606, subclass 80; and
- II. Claims 5-9 are said to a method of attaching a suture to a bone, classified in class 606, subclass 148; and
- III. Claims 12-14 are said to be drawn to detachable tip for a needle, classified in class 606, subclass 223.

Applicants elect the invention of Group I with traverse. Applicants respectfully submit that, at the very least, claims 15-19 and 27-28 should also be considered along with claims 1-4, 10, 11, 20-26 identified in the Office Action as corresponding to Group I. It is noted that parent serial number 09/476,682 included a restriction requirement.

USSN: 10/005,760

Docket No.: 687-456

Further, applicants submit that the restriction requirement will require applicants to file two additional applications in order to have all claims considered. This will require additional filing, prosecution and maintenance fees should the applications be granted. This represents a substantial burden to the owners of the present application. Applicants respectfully submit that the public would be better served if the restriction requirement were withdrawn or altered to include additional claims within Group I.

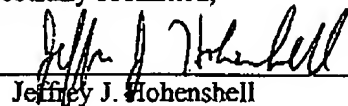

This response is being filed within one month of the Restriction Requirement (May 18, 2003 falls on a Sunday). There is no fee believed due for this response. If this is in error, please charge any fee required for the submission of this Response and the accompanying information disclosure statement to Deposit Account No 501921.

Examination and consideration of the application is requested.
